

Athletic

Allsport Premium

Provides an extra element of biomechanical support for active patients and features a synthetic suede top for comfort.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane
Module: Duramaxx™

Allsport Standard

Developed for the active patient, participating in a variety of activities.

Top Cover: Vinyl
Module: Duramaxx™
Features: 1/8" polyurethane midlayer

Sportmaxx™ Pro-Marathoner

Designed to maintain its shape and supportive qualities over the repetitive running cycle and give the ultimate stability and shock-absorption for runners.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane
Module: Duramaxx™
Features: 1/16" polyurethane midlayer, heel capping, a 1/16" heel lift (soft arch fill based on weight)

Sportmaxx™ Pro-Crosstrainer

Developed for various cross-training activities and features a synthetic suede top to reduce friction.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane
Module: Duramaxx™
Features: 1/8" polyurethane midlayer, heel capping

Marathoner Premium

Designed to maintain biomechanical control over hundreds of miles of running and features a synthetic suede top for extra soft comfort.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane
Module: Duramaxx™
Features: 1/8" heel lift, heel capping and a soft arch fill

Marathoner Standard

Developed to maintain biomechanical control over hundreds of miles of running.

Top Cover: Vinyl
Module: Duramaxx™
Features: 1/8" polyurethane midlayer, 1/8" heel lift, heel capping and a soft arch fill

Court Standard

Controls and corrects the biomechanics of an athlete who needs multi-directional support.

Top Cover: Nylon cloth on neoprene
Module: Duramaxx™

Court Premium

Offers multi-directional support, provides protection from the increased forefoot shock associated with court sports and features a synthetic suede top for extra soft comfort.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane
Module: Duramaxx™

Golf Standard

Designed to take into account the biomechanics of a golf swing as well as gait.

Top Cover: Nylon cloth on neoprene

Module: Duramaxx™

Features: First-ray cut out

Golf Premium

Provides added comfort and cushion with a synthetic suede top and also takes into account the biomechanics of a golf swing and gait.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: First-ray cut out

Sportmaxx™ Pro-Golf

Designed for walking and stance support during golf and features a synthetic suede top to reduce friction.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: First-ray cut out, 1/16" polyurethane midlayer and heel capping

Sportmaxx™ Pro-Tennis

Designed for the many stresses the foot goes through during play on the tennis court.

Top Cover: Embossed synthetic leather with 3/32" foam

Module: Duramaxx™

Features: 1/8" soft neutral forefoot post to sulcus, Heelmaxx™ and a soft arch strip or arch fill based on weight

Sportmaxx™ Pro-Basketball

Provides full biomechanical control during stop-and-go, multi-directional play on the court.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: 1/8" polyurethane midlayer, 1/8" heel lift, heel capping and soft arch fill or arch strip, based on weight

Sportmaxx™ Pro-Basketball (Flexx)

Offers shock absorption and more accommodation as well as full biomechanical control during stop-and-go, multi-directional play on the court.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duraflexx™

Features: 1/8" polyurethane midlayer, 1/8" heel lift, heel capping and a soft arch fill to the sulcus

Sportmaxx™ Pro-Soccer (Men's)

A low-profile, narrow orthotic that addresses the space limitations found in soccer cleats.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: Heel capping

Sportmaxx™ Pro-Soccer (Women's)

A low-profile, narrow orthotic that addresses the space limitations found in soccer cleats.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: Heel capping

Sportmaxx™ Pro-Baseball

A multi-faceted orthotic for batting, running bases and playing a field position.

Top Cover: Embossed synthetic leather with 3/32" foam

Module: Duramaxx™

Features: 1/16" polyurethane midlayer, heel capping

Sportmaxx™ Pro-Football

Provides ultimate motion control and biomechanical correction, yet allows the necessary amounts of pronation and supination.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: 1/16" polyurethane midlayer, heel capping and soft arch fill or arch strip based on weight

Soft Arch Fill

Ski/Skate Premium

Offers added comfort with a synthetic suede top and provides biomechanical control so an athlete can skate or ski with proper foot function.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Ski/Skate Standard

Designed to provide biomechanical control so an athlete can skate or ski with proper foot function.

Top Cover: Vinyl

Module: Duramaxx™

Features: 1/16" polyurethane midlayer

Sportmaxx™ Pro-Hockey

Developed so the foot begins in a neutral position and allows for precise amounts of pronation and supination to create optimal power in the skating stride.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: Heel capping

Note: Practitioner must provide boot make, model and size for a custom fit.

Sportmaxx™ Pro-Ski

Developed to provide the platform to begin each turn with neutrally positioned feet.

Top Cover: Brushed synthetic suede on a 1/16" polyurethane

Module: Duramaxx™

Features: Heel capping and a low profile soft arch strip

Note: Practitioner must provide boot make, model and size for a custom fit.

Soft Arch Strip
